

DocFinity Document Management Solutions for Healthcare

Helping You Provide Top-quality Services

Is it increasingly difficult for you to keep track of sensitive patient information? Are HIPAA, Medicare, HCFA, and other compliance measures consuming valuable time and resources? Are your patient records sometimes misfiled or even lost? Would your patient care be improved if doctors and support staff had instant, secure access to medical records?

The need to store and retrieve patient information without compromising daily administrative requirements presents a dilemma for many healthcare providers. In order to provide top quality services while complying with a growing number of regulations, departments within healthcare organizations must have access to vital information in a wide variety of formats, including pictures, images, electronic documents, voice messages, and videos. **How can a healthcare facility effectively manage records while cutting costs, increasing efficiencies, ensuring compliance, and maintaining high levels of service for its patients and staff?**

Optical Image Technology, Inc.'s (OIT) DocFinity® suite of products addresses each of these challenges. We offer scalable, flexible, and HL7-compliant solutions specific to the healthcare industry, with the field experience required to address your unique needs.

DocFinity's electronic document management solution (EDMS) does far more for healthcare organizations than merely provide easy access to medical records. We appreciate the need to track, retrieve, route, and manage current and accurate patient and staff information to help meet the ultimate goal of providing the best patient care possible. **Healthcare providers around the world are using DocFinity in accounting, credentialing, human resources, registration, compliance, and more. DocFinity can go anywhere you want it!**

DocFinity's unique customizable features and functionalities allow users to automate key processes, access information from different departments and remote locations, improve service to patients and staff, and realize significant savings.

DocFinity's integration capabilities, flexibility, and security options make it a powerful choice for IT administrators, and it is easy for employees to use. Healthcare organizations can implement solutions easily, yielding quick results.

The DocFinity suite's flexibility allows users to apply it to virtually any paper-based healthcare process including patient information, finance/accounting, coding, procedure entry, follow-up, storing and processing, explanation of benefits (EOBs), denial processing, and remittance. DocFinity provides the tools to automate HIPAA, Medicare, HCFA, and other compliance management processes. Documentation, retrieval, audits, and reports can all be configured using your existing system - DocFinity adds significant added value to the investments you have already made.

Whether you need imaging, reports management, workflow, barcode scanning, e-mail management, forms processing, print/fax server capability, or other elements of document management, DocFinity's electronic document management system (EDMS) and workflow products can handle virtually any challenge in the healthcare field.

Additional benefits of the DocFinity suite include:

Improved patient service

DocFinity software helps the healthcare industry to eliminate paper records, reduce keystrokes, cut costs, and increase efficiency, which ultimately leads to better and faster service for your patients and staff.

Remote access

DocFinity facilitates improved patient care by enabling doctors to simultaneously and securely review patient records from anywhere in the world at any time of day. Since records can be electronically routed to and accessed from different departments, patient processing is improved appreciably.

Automation of HIPAA, Medicare, HCFA, and other compliance management processes.

Documentation, retrieval, audits, and reports can all be configured using your existing system. DocFinity can even be configured to automatically retain or purge records, minimizing man-hours spent on system maintenance.

HL7 Integration

DocFinity integrates fully with HL7 and its application interfaces. Distinctive DocFinity features allow users to duplicate the look and feel of traditional paper folders with the convenience and timesaving benefits of digital operations.

Flexibility

The DocFinity suite can be utilized in accounting, credentialing, human resources, registration, and other departments to facilitate better services for patients and staff.

Efficiency

DocFinity ensures that work flows smoothly through your organization, and that the right files are routed to the right people at the right time. Your employees will be more productive, your records more manageable, and your savings significant.

OIT prides itself on providing users of DocFinity products with the same integrity, honesty and support that your patients and staff expect from you. We look forward to the pleasure of serving you!
